Description

As a user of the application, I want to verify that the login functionality works correctly to ensure that I can securely access my account.

The login page will identify the District at the top of the page, and display fields for Username and Password, and below, a drop-down box will be available to select the database group and school year.
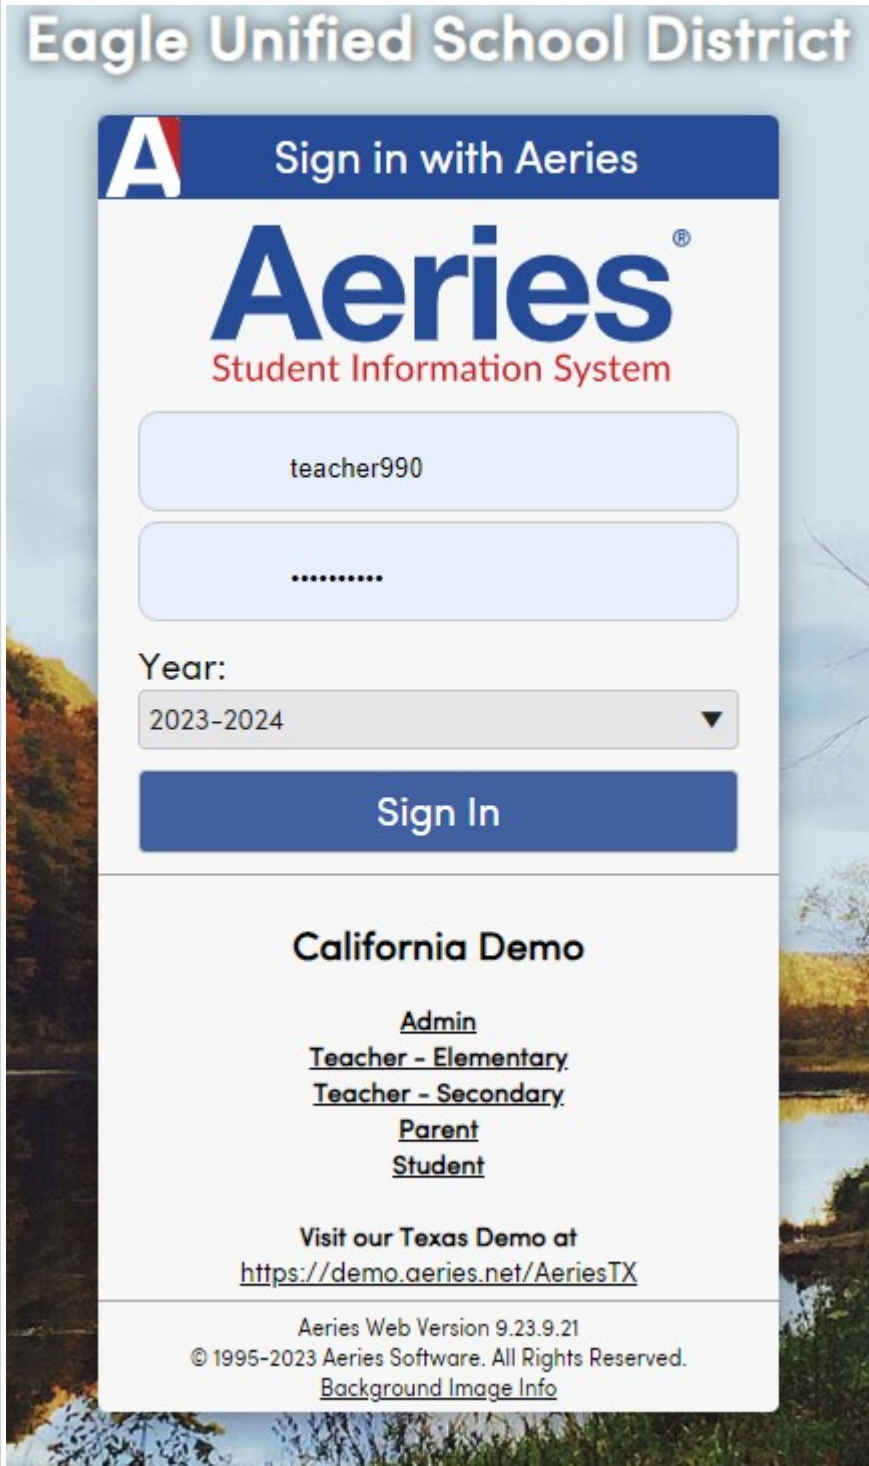

After clicking **Sign In**, the user may be asked for a school to access for users that have access to multiple schools.

At the bottom of the login page, as well as on every page within Aeries, the current version of the software will be displayed. Updates are released frequently to Aeries Web, and the version can be useful to determine if users have access to the latest features or enhancements.

When contacting Aeries Support, a support representative may also ask for the version number to help troubleshoot an issue.

In the above screenshot, the Version is 9.23.9.21. The first number represents the major version of Aeries Web you are running, such as Version 9. The remaining numbers represent the date on which it was released. For example, 9.23.9.21 is the version that was released on September 21, 2023.

Description

The **Attendance** page can be accessed for information, attendance submission, and attendance updates. Currently enrolled students will display when a teacher logs into **Aeries** and navigates to the **Attendance** page.

On the Class Attendance page, the teacher can quickly access student information through several icons. The options available are:

- View Student Profile - This icon takes the teacher to the **Student Profile** page for this student
- View Attendance Detail - This icon takes the teacher to the **Attendance Detail** page for this student
- View Contacts - this icon opens the **Quick Contacts** sub-menu for this student

Taking Attendance

The attendance date on the **Attendance** page will default to the current date and the current date will be highlighted in yellow on the **Attendance** form. To take attendance, click in the checkbox for the corresponding absence code of "A" for **Absent** or "**T**" for **Tardy** to the right of the student's name. *Attendance submission is **effective immediately** and there is no need for a **Save** button.*

The Student data columns on the Attendance page can be **sorted**. This includes the additional Student data fields that are setup on the Portal Options page to display to teachers. When a **column header** is clicked on an arrow will display and the column will be sorted in ascending or descending order.

To change the attendance submission date, click the mouse on the **Attendance Date** dropdown field which is located at the top of the page. To assist with selecting dates in the date dropdown, the current date is highlighted in green.

Description

Navigate to **Attendance by Photo** in the Teacher Portal to the **Attendance by Photo** page.

Attendance by Photo was implemented for submitting attendance. Teachers can create a seating chart that includes student photographs and take attendance using the seating chart.

In a school with a Master Schedule, the **Attendance by Photo** page limits the classes that can be selected to those for which the teacher can submit attendance.

For **Attendance by Photo** options click on the menu icon on the top right of the page. The following options will display.

- **Create New Seating Chart** – Select to create a new seating chart.
- **Open Seating Charts** – Select to open saved seating charts.
- **Print Current Seating Chart** – Prints the chart currently being viewed.
- **Enable Animation** – Selecting this option loads the chart in an animated style.
- **Hide Gridlines** – This option will hide the chart gridlines from displaying on the page.
- **Show Student Alias Name** – This option will display the student's first name alias.
- **Hide Student Name** – This option will hide the student name from displaying on the chart.

Description

The Scores By Class page was implemented to enter scores for assignments for the entire class.

Scores By Class can be selected form any of the dashboard views.

A Filter Sets list is available that contains a list of options that can be applied or deleted from "Apply" and "Delete" buttons.

Options displayed are:

- Language Standards
- Reading Standards
- L & S Standards
- Writing Standards

A "Cancel" button is also displayed in the pop-up window.

To filter Categories a filter button was implemented named "Categories". Clicking on it a pop-up window will display categories to check from check-boxes, and three buttons: "Apply Filters", "Clear Selected" and "Cancel" buttons.

To filter Standards a filter "Standards" button was implemented. A pop-up window will display when clicking on the button with all the standards that can be checked to filter.

"Apply Filters", "Clear Selected" and "Cancel"buttons are available on the pop-up window.

On the **Scores By Class** page, a form with all students enrolled is listed to the left of the page, and the Class

Assignment description is displayed on the top of the form.

A link is available on the student name list on the left side of the **Scores by Class** page. Clicking on the student name will navigate to the **Scores by Student** page.

To the right of the student name on the **Scores By Class** page is a **Profile, Calendar, and Quick Contacts** icon for each student.

When clicking on a **Score** field for a student on the **Scores By Class** page, the row will be highlighted in blue.

A checkmark will display to the left of the assignment date indicating that the assignment is marked as **Grading Complete** and also displayed in blue. When Grading Complete is not set the assignment box will display in dark blue.

The **Scores By Class** page has an **Override Not Applicable Scores** option. This option displays on Scores By Class for a gradebook that has the Filter Assignments by option set to **Assignment Due Date** under the Manage | Options area.
